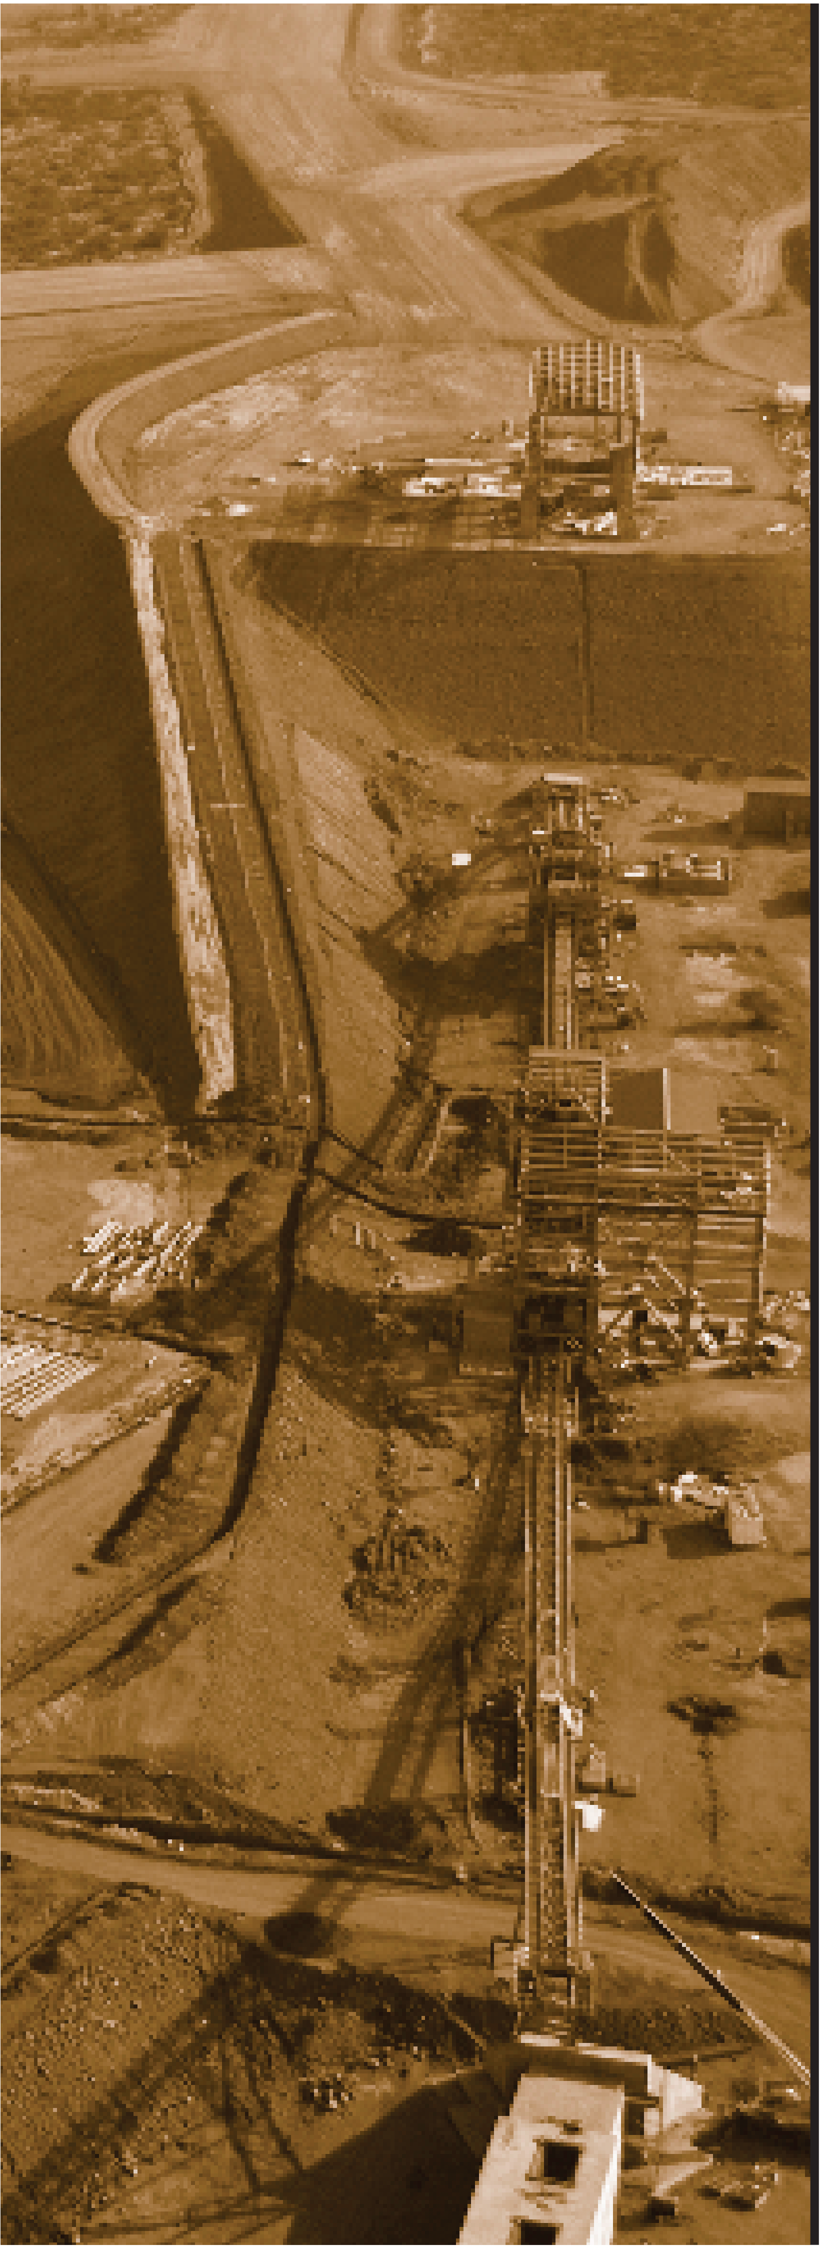
Forward looking statements

Certain statements in this presentation constitute "forward looking statements" within the meaning of Section 27A of the US Securities Act of 1933 and Section 21E of the US Securities Exchange Act of 1934.

Such forward looking statements involve known and unknown risks, uncertainties and other important factors that could cause the actual results, performance or achievements of the company to be materially different from the future results, performance or achievements expressed or implied by such forward looking statements. Such risks, uncertainties and other important factors include among others: economic, business and political conditions in South Africa; decreases in the market price of commodities; hazards associated with underground and surface mining; labour disruptions; changes in government regulations, particularly environmental regulations; changes in exchange rates; currency devaluations; inflation and other macro-economic factors; and the impact of the AIDS crisis in South Africa. These forward looking statements speak only as of the date of publication of these pages.

The company undertakes no obligation to update publicly or release any revisions to these forward looking statements to reflect events or circumstances after the date of publication of these pages or to reflect the occurrence of unanticipated events.



African Rainbow Minerals

Highlights

- Headline earnings increased by 35% to R741 million
- Headline earnings per share increased by 34% to 353 cents per share
- EBITDA increased by 38% to R1 740 million
- Record volumes in Manganese Ore, Iron Ore, Chrome Ore and Thermal Coal
- 9% increase in PGM sales
- All projects are progressing on schedule and within budget
    - Khumani Iron Ore Mine (10 million tonnes per annum);
    - Nkomati Nickel expansion (20 500 tonnes per annum); and
    - Goedgevonden Coal project (6.7 million tonnes per annum)
- Modikwa achieves a safety record of 2 million fatality free shifts

▶ we do it better

Commentary

The Board of Directors of ARM is delighted to announce the Company's record results thereby continuing to deliver on its stated strategies of organically and efficiently growing ARM into a globally competitive diversified mining company. ARM continues to be well positioned to participate in the local and global merger and consolidation opportunities.

Headline earnings, for the period, have increased by 35% to R741 million or 353 cents per share for the six months ended 31 December 2007 (2006: R548 million or 264 cents per share). The period under review has been characterised by strong commodity prices across the businesses and a 4% stronger average Rand/US dollar exchange rate at R6.94/US dollar. In addition, these results have been impacted by solid volume increases from the ferrous assets held through Assmang Limited (Assmang) and sales volumes which were maintained at the Platinum and Nickel operations.

Operational highlights for the period include (100% basis):
- 37% increase in manganese ore sales to 1.4 million tonnes;
- 18% increase in iron ore sales to 3.3 million tonnes;
- 12% increase in manganese alloy sales to 122 thousand tonnes;
- 55% increase in domestic thermal coal sales to 7 million tonnes;
- 9% increase in PGM sales to 243 thousand ounces;
- 177% increase in chrome ore sales to 653 thousand tonnes; and
- first copper production from TEAL in the Democratic Republic of Congo (DRC).

Basic earnings for the period amounted to R870 million (2006: R560 million) which include a R135 million gain from the receipt of the final tranche payment on the sale of 50% of Nkomati Nickel to Norilsk Nickel during 2005.

These interim results for the six months ended 31 December 2007 have been prepared in accordance with International Financial Reporting Standards (IFRS).

Contribution to headline earnings (unaudited)

Commodity group	six months ended 31 December		
R million	**2007**	2006	% change
Platinum	**206**	198	4
Nkomati nickel and chrome	**150**	200	(25)
Ferrous metals	**574**	261	120
Coal	**6**	24	(75)
Exploration: TEAL	**(121)**	(39)	(210)
Corporate: finance costs	**(45)**	(73)	38
Corporate: other	**(29)**	(23)	(26)
ARM headline earnings	**741**	548	35

Accounting considerations affecting earnings figures include:
- The period-on-period comparison of the Platinum segmental contribution to headline earnings by Two Rivers Platinum Mine is distorted by the inclusion in this period of interest charged on its shareholders' loans. The net reduction to Platinum attributable earnings is R28 million. There is a corresponding gain in the corporate segment and thus there is no impact on the ARM consolidated results.
- The TEAL results were fully absorbed by ARM in this period with no allocation to minorities, which would have amounted to R42 million (2006: R23 million allocated to minorities). The total expense incurred by TEAL amounted to R121 million.
- The ARM Coal attributable results for the period to December 2006 are not comparable with the current period results, as the accounting adjustments relating to purchase price allocation and related amortisation as well as imputed interest on loans were only finalised and processed after December 2006. Attributable cash operating profit for the six-month period to December 2007 of R170 million (2006: R136 million) more clearly reflects the comparative performance.

The operational volume increases, together with ARM's organic growth projects, are in line with the Company's strategy of growth to double production from 2005 levels by 2010 in key commodities with high margin operations. ARM has established a diversified commodity exposure, providing the Company with varied pricing, volume and stage of mine development exposure.

ARM's organic growth projects with its partners remain on schedule and within budget, having spent R1.4 billion (attributable to ARM) on capital expenditure over the period. Khumani Iron Ore Mine is the first project to begin ramping up with export sales from Khumani of ore processed through its own plant planned by the end of financial year 2008. Nkomati Nickel and Goedgevonden Thermal Coal projects are both on track for full production by 2011. ARM continues to develop partnerships and relationships in South and Southern Africa. ARM's commitment to grow its South and Southern African mining businesses is clearly demonstrated by its increasing investments in Africa through TEAL.

ARM continues to focus on operational cost containment through this growth phase, costs being a significant determinant of management's remuneration. Operational cost changes are in line with the planned growth, as ARM's mining production ramps up. The new and modern operations continue to incorporate best practices from ARM and its joint venture partners, using new technology, more open cast mining and better positioning with regard to infrastructure and logistics.

ARM's balance sheet remains robust with net debt (excluding partner loans) of R2.1 billion in 2007 and net gearing of 20%. ARM's earnings before interest, tax, depreciation and amortisation (excluding exceptional items) (EBITDA) margin for the period under review is 44%, with strong EBITDA growth of 38% to R1 740 million (2006: R1 265 million).

The national power shortage, which manifested itself during the past few weeks, has somewhat impacted production and processing at most of ARM's operations. There has been a compensating price spike for the majority of ARM's commodities. ARM's operations are shallow relative to the majority of other South African mines and make significant use of diesel as an energy source, in addition to their electricity requirements. This significantly reduces the safety and operational risks that may arise due to power cuts. ARM is reviewing all its operations to ensure that production is maximised in the most efficient and profitable manner at a 90% average level of power supply.

Harmony

ARM's interest in the gold sector is held through a 16% stake in Harmony.

During December 2007, Graham Briggs was appointed as Chief Executive Officer of Harmony.

Harmony reported an earnings loss from continuing operations for the quarter ended 31 December 2007 of 43 cents per share (quarter ended 30 September 2007: 30 cents per share loss) and an increase in cash operating profit of 43% to R450 million (quarter ended 30 September 2007: R315 million). Gold production for the period was 8% lower at 12 403 kilograms (quarter ended 30 September 2007: 13 523 kilograms), with cash costs for the period flat at R133 324/kg.

Harmony continues to focus on ensuring that the quality of the portfolio of assets improves, as the Company invests in longer life, higher grade mines. The Company has begun to deliver on plans related to cost control, as illustrated this quarter where it has been able to maintain flat unit cash costs, despite lower gold production. An agreement to dispose of 60% of certain uranium and gold assets of the Randfontein, Cooke Section, for a purchase consideration of US dollar 252 million has been entered into. Harmony plans to secure an international partner for the development of the Papua New Guinea (PNG) assets.

The ARM balance sheet at 31 December 2007 reflects a marked-to-market investment in Harmony of R4 484 million, which is based on a Harmony share price of R70 (2006: R111). Changes in the value of the investment in Harmony are accounted for by ARM through the statement of changes in equity, and the investment is reflected at market value in the balance sheet.

Harmony announced its results for the quarter ended 31 December 2007 on 15 February 2008 and these can be viewed on www.harmony.co.za.

Broad-based Economic Empowerment (BBEE) Trust

The Trust, established in April 2005, has allocated Units to its beneficiaries having an income value of the equivalent of 10% of ARM's issued share capital. The beneficiaries of the Trust currently includes five broad-based provincial upliftment trusts, a broad-based women upliftment trust, various church groups, trade union representatives and will, in the future, include several community, business and traditional leaders.

Commentary *(continued)*

In the period of almost three years since the establishment of the Trust and with two years remaining to repay the funding raised for the Trust to acquire the ARM shares, the beneficiaries have started receiving funds from distributions made by the Trust. On 18 February 2008, an amount of approximately R8 million was distributed to the beneficiaries. This amount is derived from a portion of the ARM dividend received by the Trust during October 2007. ARM views this as a significant step towards the fulfilment of the objectives of the Trust, which is to improve the living conditions of the poor and unemployed and to uplift rural communities and women.

OPERATIONAL REVIEW

ARM Ferrous

The ARM Ferrous operations, which are held through its 50% investment in Assmang, consist of three divisions, namely: iron ore, manganese and chrome. Assore Limited, our partner in Assmang, owns the remaining 50%.

Assmang reported an increase of 69% in its turnover for the six months to 31 December 2007 to R4.4 billion (2006: R2.6 billion). Headline earnings increased substantially by 118% to R1 146 million (2006: R525 million).

Assmang headline earnings contribution

100% basis	**six months ended 31 December**		
R million	**2007**	2006	% change
Iron ore division	**264**	260	2
Manganese division	**776**	244	218
Chrome division	**106**	21	405
Total	**1 146**	525	118
Headline earnings attributable to ARM (50%)	**574**	261	120

The increase in headline earnings is primarily attributed to increased sales volumes and prices for iron ore, manganese ore and alloys, as well as chrome ore and charge chrome. ARM expects the existing strong demand for its products to continue, supported by material increases in US dollar contract prices for iron ore, manganese and chrome ore and alloys.

Assmang product sales

100% basis	**six months ended 31 December**		
Thousand tonnes	**2007**	2006	% change
Iron ore division	**3 286**	2 783	18
Manganese ore*	**1 434**	1 046	37
Manganese alloys*	**122**	109	12
Charge chrome	**115**	107	7
Chrome ore*	**116**	69	68

** Excluding intra-group sales*

The planned cost increases at the Beeshoek iron ore operations during the period under review were mainly due to the higher cost of road transport from Khumani iron ore mine to Beeshoek iron ore mine and reduced production tonnages at Beeshoek.

Assmang capital expenditure

100% basis	**six months ended 31 December**	
R million	**2007**	2006
Iron ore division	**1 366**	483
Manganese division	**163**	87
Chrome division	**55**	87
Total	**1 584**	657

The major portion of the capital expenditure of R1 584 million (2006: R657 million) was spent on the ongoing infrastructure development of the new Khumani Iron Ore Mine amounting to R1 307 million. In addition R52 million was spent on the rebuild of a furnace at the Cato Ridge Works ferromanganese smelter.

During the period under review Assmang obtained a R1.4 billion term loan facility to assist with funding the completion of the Khumani Iron Ore Mine. At 31 December 2007, R200 million had been drawn against this facility.

Logistics

Assmang has finalised a 20-year contract with Transnet for an allocation of 10 million tonnes per annum to be exported through the port of Saldanha. Transnet and other industry role players are currently evaluating and negotiating the next capacity expansion project from 47 million tonnes per annum to 60 million tonnes per annum.

Assmang and Transnet are currently finalising manganese ore allocation increases above the current Assmang allocation of 1.85 million tonnes per annum through Port Elizabeth.

Khumani Iron Ore Mine

Mining commenced at Khumani in May 2007 and the first product from processing through its own plant is expected during April 2008. The project is funded from Assmang operational cash flows and debt facilities. Khumani Iron Ore Mine is on schedule for full commissioning by the end of June 2008 and a subsequent ramp-up to full production of 10 million tonnes per annum by 2010.

Further expansion to increase to 20 million tonnes export production per annum is being investigated. This second phase of expansion is subject to the successful conclusion of negotiations with Transnet and will be submitted to the Assmang board and shareholders for consideration later this calendar year.

ARM Platinum

ARM Platinum consists of three operating mines.

The first mine is Modikwa Platinum Mine, where ARM Platinum has an effective 41.5% economic interest and the local communities have an 8.5% economic interest. The remaining 50% is held by Anglo Platinum. Two Rivers Platinum Mine is the second mine and ARM owns 55%. Its partner Impala Platinum owns 45%. The third mine, Nkomati Mine, is a 50:50 joint venture partnership with Norilsk Nickel, which produces nickel in concentrate and chrome ore.

ARM Platinum continues to enjoy strengthening PGM pricing and is approaching steady state production at both platinum operations. Nkomati Nickel has decreased its contribution to ARM headline earnings due to lower volumes and a lower received US dollar nickel price.

ARM Platinum's contribution to headline earnings decreased by 11% to R356 million for the six months to 31 December 2007 (2006: R398 million). The six months to 31 December 2007 have seen total PGM sales increase by 9% to 243 thousand ounces as Modikwa and Two Rivers build up to full production levels. ARM expects improved operational performance and strong PGM prices in the second half of financial year 2008.

ARM Platinum capital expenditure

Capital expenditure increased by 14.7% from R484 million to R555 million, to sustain and grow production in the following areas:

Modikwa Platinum Mine	– North shaft decline extension
Two Rivers Platinum Mine	– 40 000 tonnes per month north decline development
Nkomati Nickel and Chrome Mine	– Commissioning the 100 000 tonnes per month MMZ plant

ARM Platinum capital expenditure

100% basis	six months ended 31 December	
R million	**2007**	2006
Modikwa Platinum Mine	**164**	99
Two Rivers Platinum Mine	**185**	228
Nkomati Nickel and Chrome Mine	**206**	157
Total	**555**	484

Commentary *(continued)*

Modikwa Platinum Mine

Modikwa's cash operating profit was R495 million for the six months ended December 2007 (2006: R491 million), while attributable headline earnings contribution increased by 7% to R108 million.

Production output for the period under review decreased by 7% as a result of a slower than anticipated ramp-up to normal production levels after the re-introduction of continuous operations (conops) from June 2007. Furthermore, Modikwa has focused on repositioning the mine for improvements in productivity by establishing additional working panels, which is having a short-term impact on costs but with long-term benefits. Labour relations have improved with a new two-year wage agreement now in place, effective January 2008.

Unit cash costs increased by 23% compared to the six months period ended 31 December 2006 (10% compared to the 12 months period to 30 June 2007). Re-capitalisation of the mechanised fleet is expected to have a favourable impact on productivity and unit cash costs going forward.

Modikwa operational statistics

		six months ended 31 December

Previously approved capital has advanced the down dip development of North Shaft from 4 to 6 level and the down dip development of South Shaft is scheduled to commence in the first half of calendar year 2008. Trial mining of the Merensky reef produced 65 392 tonnes in the past six months and is planned to continue at 12 000 tonnes per month for the next six months.

Two Rivers Platinum Mine

Two Rivers' cash operating profit was R401 million for the six months ended 31 December 2007, while the headline earnings contribution (after interest on shareholders' loans, tax and minorities) was R98 million.

Two Rivers operational statistics

		six months ended 31 December

The development ore stockpile has been depleted and underground production is expected to reach the planned steady state output of 225 000 tonnes per month before the end of the financial year 2008.

Underground operations achieved a higher than planned waste dilution due to a larger proportion of undulating split reef and pot holes. This has resulted in the 8% reduction in the head grade (6E) and a 16% increase in unit cash costs. In the last few months, Two Rivers has been achieving improved grades and production levels.

The North Decline development and production is ahead of schedule and achieving 40 000 tonnes per month. The concentrator commissioning concerns have been addressed and recoveries are expected to improve as Two Rivers approaches steady state operations.

Nkomati Nickel Mine

Nkomati reported a cash operating profit of R446 million compared to R602 million in the corresponding period in the prior year. This 26% decrease in cash operating profit was as a result of a 5% decrease in the realised dollar nickel price, a 10% reduction in nickel in concentrate sales and a 46% reduction in PGM sales.

The high grade Massive Sulphide Body (MSB) ore body has been effectively depleted and the mine is ramping up production on the lower grade Main Mineralised Zone (MMZ) ore body. This is progressing according to the mining plan. As a result of Nkomati transforming into a high volume, low grade mine, head grade reduced in line with plans to 0.82% Ni compared to 1.98% Ni in the corresponding period. Mining unit costs have declined from R446 per tonne to R321 per tonne due to the shift from underground mining to open pit operations.

Nkomati operational statistics

		six months ended 31 December		
100% basis		**2007**	2006	% change

Headline earnings attributable to ARM (50%)	R million	**150**	200	(25)

** Contained metals in concentrate*

The 100 000 tonnes per month MMZ plant was commissioned on time and within budget. Steady state production is expected from this plant in the first quarter of 2008. Chrome sales have increased from 166 648 tonnes to 537 002 tonnes in the comparable six-month period. The chrome operations' contribution to the Nkomati Mine cash operating profit was 45% for the period under review. Looking forward, based on existing commodity prices, the chrome contribution to Nkomati Mine cash operating profit is expected to remain significant until the Nkomati expansion project has ramped up to full nickel production in 2011.

A significant chrome fines stockpile of 1.5 million tonnes has been generated from the production of the lumpy chrome. A 100 000 tonnes per month chrome fines re-treatment plant (at a capital cost of R68 million) is being constructed to process the resultant fines stockpile, with commissioning expected in the third quarter of 2008.

Nkomati Nickel Expansion Project

The Phase 2 Expansion Project was released by the joint venture partners, ARM and Norilsk Nickel in September 2007. The 375 000 tonnes per month plant is scheduled for commissioning in September 2009. All major equipment has been ordered and earthworks for the plant have commenced. The pre-stripping contract for the

Commentary *(continued)*

opencast has been awarded and is expected to commence in March 2008. Firm commitments from the South African electricity generators for the power supply for this project have been secured. As at 31 December 2007, approximately R677 million has been committed of the total capital expenditure requirement of the R3.2 billion announced at project release.

Kalplats

The Kalplats PGM project, situated 330km west of Johannesburg, is a joint venture between ARM Platinum and Platinum Australia Limited (PLA). PLA is earning-in up to 49% of the project by completing a bankable feasibility study and providing the right for the project to use the Panton metallurgical process. To date, PLA has completed approximately 38 000 metres of drilling as well as other studies as part of the feasibility study. The combined indicated and inferred mineral resource currently contains approximately 3.5 million ounces 2E PGMs (Pt, Pd + Au), representing an average grade of 1.4 g/t. Exploration has also started on the Kalplats Extended Area, which is a 50:50 joint venture between ARM Platinum and PLA.

ARM Coal

ARM owns 51% of ARM Coal, which in turn owns 20% of Xstrata Coal's South African operations and 51% of Goedgevonden. In addition, ARM owns a direct 10% stake in Xstrata Coal's South African operations. ARM's effective economic interest in Xstrata Coal South Africa is 20.2%, and in Goedgevonden is 26%.

Cash operating profit increased by 25% to R170 million for the six months ended 31 December 2007 (2006: R136 million). In the period under review, domestic thermal coal sales and prices increased significantly as Eskom's requirement for coal continued to increase. Total export thermal coal sales volumes remained flat with a substantial increase in the US dollar price received. During the six months under review cash flow from Xstrata Coal South Africa (excluding Goedgevonden) was re-invested into capital expenditure and as a result no dividend will be received in respect of the period to December 2007. A R20 million dividend was received from ARM Coal during the period under review for the six month period to June 2007.

ARM Coal operational statistics

		Six months ended 31 December		
		2007	2006	% change
Total sales	Million tonnes	**14.71**	11.95	23
Export thermal coal sales	Million tonnes	**7.62**	7.38	3
Domestic thermal coal sales	Million tonnes	**7.09**	4.57	55

Cash operating profit				
Total	R million	**834.00**	734.34	14
Attributable	R million	**169.79**	135.88	25
Headline earnings attributable to ARM	R million	**6**	24*	(75)

** Excludes accounting adjustments as described above*

Total figures as disclosed above relates to 100% of the Xstrata Coal South Africa operations, including Goedgevonden. Attributable figures relate to ARM's effective 20.2% of Xstrata Coal South Africa operations and 26% of Goedgevonden.

Earnings from the coal division attributable to ARM were negatively impacted by a number of accounting issues:
– the IFRS accounting requirement relating to imputed interest on the Xstrata debt facilitation
– additional amortisation at the ARM level provided as a result of the IFRS purchase price allocation rules.

Reconciliation of headline earnings to cash operating profit (R million)

ARM attributable headline earnings reported	6
Add: Additional amortisation	15
Imputed interest on Xstrata R4 billion debt facilitation	15
Less: Taxation	(8)
ARM attributable headline earnings excluding IFRS adjustments	28*
Add: Normal interest	40
Normal amortisation	90
Taxation	12
ARM's attributable cash operating profit	170

** Compares to R24 million for the 6 months to December 2006 financial results*

Goedgevonden Thermal Coal Project

Construction at the Goedgevonden project released during the previous financial year is progressing well and it is expected that the project will be commissioned on time and within budget in the first quarter of 2009.

First production from the Goedgevonden coal handling preparation plant (CHPP) is expected during 2009 building up to steady sales levels in 2011. The capital cost for the project is estimated at R3.2 billion (including Phase V RBCT expansion) and at full production the mine is expected to produce 6.7 million tonnes per annum. The mine has committed capital to date of R1.8 billion. About half of the production will be marketed locally and the balance will be exported through the RBCT Phase V expansion entitlement.

TEAL Exploration & Mining Incorporated (TEAL)

TEAL is 65% owned by ARM and listed on the Toronto Stock Exchange. TEAL owns exploration assets in the DRC, Zambia and Namibia.

In the DRC, TEAL has commissioned the first phase of a mine at the Lupoto Copper Project, which reached full production levels at the end of the 2007 calendar year. Original production targets have been exceeded with over 11 000 tonnes of copper concentrate grading over 25% copper being produced over the last six months. These concentrates are sold to various customers that operate electric-arc furnaces. The exploration drilling programme at Lupoto is in progress and a pre-feasibility study for a mine at Lupoto is underway.

TEAL's Board of Directors has been presented with a feasibility study for the Konkola North Copper Project in Zambia for consideration. Within the southern portion of the Konkola North property, TEAL is conducting an exploration programme to confirm the large historical resource base contained within Area 'A' (107 million tonnes at 2.30% copper) and Area 'A' Extension (63 million tonnes at 2.88% copper). Initial drilling results are encouraging.

In Namibia, TEAL recently announced further high grade drilling results from its Otjikoto Gold Project.

In line with its stated strategy, TEAL will continue to invest further capital (through for example exploration activities and feasibility studies) in upgrading the value of the various rights and properties owned by it in Namibia, Zambia and the DRC.

TEAL announced its results for the period to 31 December 2007 on 14 February 2008 and these can be reviewed on www.tealmining.com.

Safety and Health

ARM, together with its partners, reported an improvement in the safety performance at the Black Rock manganese, Dwarsrivier chrome and Modikwa platinum mining operations and the Machadodorp chrome smelting operations.

It is with regret that management reports the occurrence of two fatalities. On 5 July 2007, Mr Khukhutje was fatally injured at the Two Rivers mine. On 14 December, Mr L Tenza passed away at the Cato Ridge Furnace. The Company extends its sincere condolences to the bereaved families and friends of Messrs Khukhutje and Tenza.

Commentary *(continued)*

The following operations are to be commended for excellent safety achievements:

- Modikwa completed Two Million fatality free shifts and has achieved a fatality free calendar year.
- Black Rock Manganese Mines achieved the milestone of Two Million fatality free shifts and won the underground section of the DME's Northern Cape Safety competition for the second consecutive period.
- In the 1 000 fatality free production shift competition Dwarsrivier mine achieved a total of 2 997 fatality free production shifts in December 2007. In the 250 000 fatality free shift category the mine recorded 594 559 fatality free shifts worked up to the end of the December 2007 quarter.

Outlook

ARM will continue to benefit from a very strong global commodity cycle driven in the main by the supply side struggling to meet continued strong demand for infrastructure development, particularly in China. Increasing volume demand will be supported by strong US dollar prices across ARM's product sales, particularly with regard to bulk commodities sold mainly on contract such as iron ore, manganese ore, chrome ore and thermal coal. All businesses are expected to continue to benefit from a weaker Rand to the US dollar exchange rate.

ARM operations mainly consist of surface/opencast operations and relatively shallow mines, most with decline shaft systems. The impact of electricity supply (down to 90% of average historic usage) will be managed through more innovative mining and operational schedules; optimising plant and furnace usage and the application of available electricity capacity to higher margin businesses.

Dividends

The Board of Directors has decided to consider dividends on an annual basis due to its significant growth pipeline. As a result no dividend was declared for the six months ended 31 December 2007.

Signed on behalf of the Board:

PT Motsepe
Executive Chairman

AJ Wilkens
Chief Executive Officer

Johannesburg
20 February 2008

Notes to the Financial Statements

for the six months ended 31 December 2007

1. BASIS OF PREPARATION

The results for the half-year have been prepared in accordance with the International Financial Reporting Standards (IFRS), on an historical cost convention, as modified by the revaluation of available-for-sale financial assets, and financial assets and financial liabilities (including derivative instruments) at fair value through the income statement or the statement of changes in equity.

These consolidated financial statements are prepared in accordance with IAS 34 – interim financial reporting.

The financial information for the half-year ended 31 December 2007 has been prepared adopting the same accounting policies used in the most recent annual financial statements.

The group has adopted all the new and revised standards and interpretations issued by the International Financial Reporting Interpretation Committee (IFRIC) of the IASB that are effective 1 January 2007. There were no financial effects on these, only disclosure issues, that will be addressed in the June 2008 annual report.
