

- Headline earnings\* down 27% to R77 million
- Net cash flow from operating activities up 464% to R237 million following the disposal

- Nkomati, now 100% owned, delivers strong operational performance

  • Net gearing reduced to 11%
- US\$ borrowings fully repaid by 31 August 2003

# commentary

# strategic transformation update

strategic, transformation update following a review of the strategic direction and future structure of Avmin, an announcement was made on 13 November 2003 which will result in the creation of the largest black controlled mining company south Africa after a series of transactions between Avmin, African Rahbow Minerals & Exploration Investments (Proprietary) Limited and Harmony Gold Mining, Company Limited ("Harmony"). On 23 March 2004 a circular containing details of the transactions and reviewed Istings particulars was posted to shareholders. Subject to the requires shareholder, regulatory and other approvals Avmin will change its name to African Rahabow Minerals Limited and the board, management and strategy will be reconstituted to reflect the new ethors of the Company.

group reSultS
A major determinant of the financial performance during the six months was the rand/US dollar exchange rate, which averaged USS/R/1,3 compared to the corresponding 2002 periods USS/R/10,10 miles represents a 29 per cent strangelpening of the average exchange rate between the two periods. The stronger rand has affected Avmin's results in two ways, firstly by lovening revenue and income earned by Group operations, and secondly by lovening earnings as a result of a significant unrealised charge to the income statement from non-hedge derivatives resulting from the conversion of rand gold hedges to USS gold hedges by Ayold, Shareholders were informed that the value of the rand would negatively affect results in the trading update issued on 27 November 2003.

The Group's revenue declined by 14 per cent to R2.0 billion (2002; R2.3 billion). Costs of production were, however, well contained during the period. Headline earnings before urrealised non-hedge derivatives weakened by 28 per cent to 67 cents per share (93 cents per share). Faking into account has ACI33 adjustment of R184 million (N81) a headline loss of R1 million was recorded. A net cash flow from operating activities of R237 million (R42 million) was recorded for the period. This increase was primarily as a result of reduced cash demands relating to Chambrish and increased cash distribution from Nicomati. Outflows from investing activities were dominated by the continued heavy capital oppenditure in ferrous metals, and totalide R299 million (R297 million). There was a net decrease in cash and cash equivalents of R46 million to R219 million at 31 December 2003.

The Group's net debt-to-total-equity ratio showed ended 31 December 2003 and 2002, whereas the ratio remained constant at 11 per cent as at 30 June and 31 December 2003.

Operationally, Avgold Limited's ("Avgolds") Target gold mine continues to perform well and during the smooths exceeded its planned pro-rated annual production levels of 175 000 ounces of gold. Shortly, after the end of the half-year, Avmin acquired the remaining 25 per cent of the Nicomati joint venture from Angol Operations. Limited a subsidiary of Anglo American plc. This acquirition provides Amin with the strategic flexibility required to advance plans currently being considered for a significant expansion of Nikomata A strong operational performance and plc. This acquirition provides after the Arminological control of the Arminologic considered for a significant expansion of Nikomata A strong operational performance and plc. This acquirition provides and the mines' contribution to earnings increase from R57 million to R77 million.

## safety, health and sustainable development

s pleased to announce that operations ared to the previous corresponding per

continues to proactively manage the Group's HIV/AIDS exposure by ongoing monitoring and ment of the impact the pandemic may have on its businesses.

#### ferrous metals

Despite increased sales volumes for all products, earnings were substantially lower than the corresponding period of the previous year as cautioned in the trading update issued on 13 November 2003.

Assman's products are priced principally in US dollars and the period under review has seen a significant strengthening of the rand with the average exchange rate realised on the group's exploring proceeds being R698 to the US dollar against R1002 in the equivalent previous period por the competitive markets in which the group's products trade, and like most other resource companies in South Africa at present, a change of this extent seriously affects profitability and was sufficient to completely negate the higher unit prose schwede in US dollars for ferro-alloys and the strong volume sales performances achieved in the group's products as summarised in the table below. Assman pronific table:

# nang product sales:

Six months to:		31 December 2003	31 December 2002	% change
Manganese ore	(tons)	662 867	409 443	62
Iron ore	(tons)	2 493 824	2 259 433	10
Manganese alloys	(tons)	100 489	96 908	4
Charge chrome	(tons)	126 860	103 641	22

Assuring's revenue for the half-year ended 31 December 2003 declined by 1.4 per cent to R1 332, million (R1 351,2 million) Attributable earnings decreased by 97.0 per cent to R41 million (R137.7 million), equivalent to R1,15 per share (R39.75 per share), The tax charge for the period of R149 million is high in relation to profit before tax due to charges for the State's share of profit on the magnatese mining operations and Secondary Tax on Companies.

the manganese mining operations and Secondary Tax on Companies.

Assmang continued its significant capital programme, spending RDBI, million (R139.6 million) during the period under review of which R77.0 million was spent on its new shaft complex at the Nchwaning manganese mine. Production from this shaft is expected to commence during May 2004 and capital expenditure will be substantially completed by December 2004 thereby providing ore reserves from more than 20 years. The cost of the new shaft complex is estimated at R890 million Plant production levels from the existing and new Nchwaning shaft complex will be adequate to satisfy customer demand staking account of rail and harbour logistical constraints.

Current enhancement projects include the completion of the Nchwaning shaft complex, the construction of an underground mine at Dwarsvier Crome Mine to replace the existing opencast mine and the development of additional reserves at the iron ore division.

mine and the development of additional reserves at the iron one division. Demand for the group's products remains buoyant and frontages over the balance of the financial year are expected to approximate those of the period under review. US dollar prices for the group's products are also expected to be higher which, given a stable rand/US collar exchange rate, could cause earnings to increase in the second half Shareholders are however reminded that earnings performance will continue to be largely dependant upon the rand/US dollar exchange rate and, to a lesser extent, upon cost savings achieved by the operating divisions.

Avoido's comparative results for the half-year ended 31 December 2002 include ETC. The sale of ETC in May 2003 combined with the lower average rand/ US dollar exchange rate of R7.13 (R10.12) resulted in a decrease in revenue to R446,9 million (R502,4 million).

Cold sold decreased marginally to 9586kg (6009kg), while the yield increased significantly to 11.08g/t (8.13g/t), while the yield increased significantly to 11.08g/t (8.13g/t) as a result of higher gold grades mixed from areas identified as part of the redesigned mixing plan – based on rock mechanic design criteria. These grades (11.08g/t) will reduce in future in line with this mixing plan. Cash costs decreased 25 per cent to R43 461/kg (R57 951/kg). The increase in operating profit to B18 million (R49.6 million), despite the lower revenue, reflects the efficiencies of the mechanical mixing methods employed at Target. Capital expenditure increased marginally to R47.9 million (R46.5 million).

Six months t	0:	31 December 2003	31 December 2002*	% change
Gold sold	Kg	5 986	6 009	_
Cash costs	R/kg	43 461	57 951	(25)
	US\$/oz	190	178	7

### nickel

nICKeI

Awmin has acquired the 25 per cent of Nicomati that it did not already own from Anglo Operations
Limited for R260 million, with effect from 1 February 2004. The transaction values Nicomati at just over R1 billion and will be value enhancing, allowing for improved cash flow into Avmin.

Operationally, Nicomati recorded another strong performance for the half year to 31 December 2003.

Ore treated increased 21 per cent to 169 000 tons (140 000 tons), producing 28 700 tons (28 900 tons) of concentrates with average grades of 10,0 per cent (10,2 per cent) for nickel and 6,0 per cent (6,5 per cent) for copper. Nkomati sales volumes:

Six months	to:	31 December 2003	31 December 2002	% change
Nickel	(tons)	2 440	2 620	(7)
Copper	(tons)	1 590	I 670	(5)
Cobalt	(tons)	28	33	(15)
PGMs	(ounces)	19 800	19 040	4

Excluding nickel, other metals contributed 24 per cent of the mine's total revenue. The mine remains cost competitive with a nickel production cost, net of by-product credits, of US\$1,15/lb, while the average nickel price over the period amounted to US\$4,9/lb (US\$3,16/lb).

### platinum

The Two Rovers project team, currently assessing the viability of a new platinum group metals venture in a partnership between Awmin and Impala Platinum Holdings Limited, has been given board approval to proceed with small-scale trial mining. Full project release is conditional on the outcome of the current programme and the outlook of the rand.

### dividends

In light of the Company's financial performance, the board does not consider it appropriate to declare a dividend for the six months ended 31 December 2003.

# future prospects

Demand for the Group's products is at present strong and is expected of the Rand/US dollar exchange rate will affect the results significantly.

### directorate changes

ive director resigned from the board on 4 February 2004.

J C Steenkamp Chief Executive Officer

Johannesburg 23 March 2004
