There is no disclosure of segment assets and liabilities as it is not possible to specifically allocate tangible assets and liabilities to specific segments.

Management has determined the operating segments based on the reports reviewed and this is supported by management reporting disciplines, which include monthly variance reporting. Insimbi's performance is monitored continuously and issues arising are addressed at monthly management meetings that have board representation present.

Management considers the business from both a geographical and product management perspective. Management assesses the performance of the operating segments based on measures such as gross and operating profit.

COMMENTARY

The directors of Insimbi are pleased to announce the audited results for the year ended 29 February 2012.

1. Basis of Preparation and Accounting Policies The results for the year ended 28 February 2013 have been prepared in accordance with International Financial Reporting Standards ("IFRS"), specifically IAS 34 Interim Financial Reporting and AC 500 Statements, and comply with the requirements of the Companies Act 71 of 2008 and the Listings Requirements of the JSE Limited. The principle accounting policies applied by the group in the abridged consolidated financial results for the year ended 28 February 2013 are consistent with those applied in the consolidated financial statements for the year ended 29 February 2012. These financial statements do not include all the information for full annual financial statements and should be read in conjunction with the consolidated financial statements for the year ended 28 February 2013. The results have been audited by Pricewaterhouse Coopers Inc. Their unqualified audit report and the audited financial statements are available for inspection at the company's registered office. These abridged financial statements have been prepared under the supervision of Fred Botha(CA)SA (Commercial and Financial Director).

2. Review of activities

Insimbi continues to operate out of our offices in Johannesburg, Durban, Atlantis and Kitwe and we are actively represented in the Democratic Republic of the Congo and Zimbabwe via our agents there. In addition, we continue to service most sub-Saharan and central African countries, as well as certain north, west and east African countries. We are also active in South America, Eastern Europe, certain Middle East countries and the UAE, Japan and Korea as well as India.

3. Financial Review

Due to the poor economic conditions experienced in the second half of the financial year and while the group results remained in the black for the year, our operating results for the year ending February 2013, were well below our results for the immediately preceding year-ending February 2012.

Group revenue dropped by only 0.8% (or R7 million) to R828 million and earnings decreased by 49% to R7.9 million, down from R 15.6 million in the previous year. Headline earnings decreased by 48.3% to R7.9 million.

In addition to the difficult trading conditions locally, which exhibited themselves mainly in the second half of the financial year, the Euro zone continued to suffer from retarded and even negative growth and this had a negative impact on our exports. Trade to our traditional emerging market partners, was promising but the expected recovery in Europe did not occur as Portugal, Italy, Greece and Spain as well as Cyprus continued to implode.

The group produced a gross profit of R83,5 million compared to R90,0 million in the previous year, a decrease of 7,3%. Gross margins were slightly down at 10,0% compared to 10,8% in the previous year and is evidence of the difficult market conditions and low commodity prices experienced during the year. Gross margins were 10,6% at 31 August 2012 compared to the full year gross margin of 10,0%.

Group consolidated net operating expenses were again well controlled throughout the period under review and were R67,1 million compared to R61,1 million in the previous year, an increase of only 8,9%. I am very pleased with this, especially in light of the increases experienced in fuel and electricity during the year. Staff costs were increased 1n line with CPIX during the period.

Group net profit before taxation for the period was R13,0 million compared to R21,9 million in the prevlous financial year, a decrease of 40,6%.

As always, our ability to manage our working capital and cash flow remained a key focus area for the group's management and proved 1nvaluable in trading through the dlfficul: second holt of the yeal and R38,5 million was generated from operations compared to R4 1.2 million in the previous year, a decrease of only R3.7 million or 6,6%. Lower borrowings were reflected in decreased finance costs of R6.7 million compared to R7,3 million in the prior period, a reduction of R0,6 million in interest (9%,).

4. Market and Prospects

The Foundry Segment has experienced mixed trading conditions during the period under review mainly, due to the labour unrest particular during the second half of the financial year.

The Steel Segment did initially show signs of improvement in the first half of the year but the strike action in various industries together with the Mittal Vanderbiljpark fire that stopped production for some months did have a negative impact on this segment.

The Refractory Segment had the most stable trading conditions of all segments and performed better than the previous year mainly due to the PPC De Hoek upgrade project. Unfortunately the planned infrastructure spend did not materialised in the year under review and this effected the construction industry tremendously and had a negative impact on cement demand, that in turn limited cement kiln repairs.

allocated to infrastructure on said projects together with labour unrest impacted negatively on certain product ranges and off-take volumes but we are optimistic that systems have been put in place by the relevant authorities in the current financial year to ensure that the R845 billion budgeted for infrastructure uplift over the next three years, is in fact spent on the planned projects.

This will have a very positive impact on our business.

Economic conditions in South Africa is under pressure and with the GDP growth rate being lower than expected, I believe the 2014 financial year, will be one with some challenges and market conditions will stay relative flat until such time the infrastructure spend kicks in and the ongoing events in Europe show signs of stabilization.

Insimbi will continue targeting markets that are considered to be emerging and the group will focus on these markets. We have a diverse range of products on offering and with the re-opening of the secondary aluminium smelter in Johannesburg (which was mothballed in 2010), the establishment of a subsidiary company, Insimbi Nano Milling, which will be focusing on the micronisation of a completely new range of products for new target markets, and the addition of certain products to our basket, I am confident that the group will continue to achieve satisfactory organic growth in years to come.

As for acquisitive growth opportunities, we continue to look for and carefully evaluate strategic targets and while we have not achieved the number of acquisitions we had hoped for, post listing, the few that we have achieved, have added value to the group's results and we remain committed to this acquisition strategy.

5. Special resolutions
