Condensed Interim Financial Results

For the half year ended 30 June 2022

### ADMINISTRATOR'S LETTER

for the six months ended 30 June 2022

### OVERVIEW

The first half of 2022 operating environment was characterised by general increase in commodity prices and raw materials including diesel, explosives and equipment spares. This was partly caused by the ongoing Russia-Ukraine war which sparked global inflation and increase in interest rates. Despite challenges, the company managed to continue with operations in both production and sales throughout the period. I report the performance for the half year below.

### FINANCIAL PERFORMANCE

Despite the increase in revenue, the company posted losses for the period, of ZWL 3.97 billion in inflation adjusted terms. The net loss is a result of ZWL 8 billion exchange loss on foreign legacy debts during the period under review.

The Company's gross profit increased by 74% to ZWL 4.54 billion in inflation adjusted terms compared to same period last year. This was largely due to a combination of an increase in sales volume and regular product price adjustments in line with market value.

### REVIEW OF OPERATIONS

The Company's production increased by 52% during the period under review. The sales volumes, however increased by only 74% compared to 2021. Limited availability of spares and the general increase in prices of maintenance spares and consumables affected the operations negatively.

The strategic priorities for the Company's half year were as follows:

a) Safety, Health, Environment and Quality

HCCL experienced a fatality free shift record as at 30 June 2022. The lost shift injury frequency rate improved due to initiatives like people focus, systems implementation and technology embracing. HCCL embraced a risk/ opportunity-based approach to operations aimed at zero harm. Top risks included Acid Mine Drainage, for which an Environmental Management Plan (EMP) to manage its effects is now in place. Likewise, robust measures aimed at reducing similar incidents related to non-communicable diseases were established through a Wellness policy.

b) Open Cast Mining

Total coal mined by Opencast operations was 1 288 521 tonnes, a 55.59% increase in production from the previous year. The steady production is mainly attributed to the successful contract mining model the company has employed.

A total of 676 387 tonnes of coal was produced for Hwange Power Station and Zimbabwe Zhongxin Electrical Energy for electricity generation during the course of the year, which was 124% increase from previous year. Deliveries into the power station were however negatively affected by limited stock holding space in the power station.

c) Underground Mining

Main Underground Mine coal production was 19.49% lower than the previous year. This was mainly due to ageing underground mining equipment. The strategic plan is to have two new continuous miners within the next 18 months. This will result in the company's underground mine reaching optimum production capacity. The first continuous miner is expected to be commissioned before end of this year.

d) Fixed and Mobile Plant

The average feed recoveries for HCCL dry screening and wet screening plants were 98% and 90% respectively. Coking coal recovery from Jig & Floatation and HMS plants was 70% of plant feed. The company needs to improve its current washing capacity, as both the HMS plant and the Jig and Floatation plant are outdated and need constant maintenance and repair. This has put pressure on the company's limited working capital. The company intends to have modular plants and washing plant located near the mining areas within the next 24 months.

## OUTLOOK

Global coal prices continue to rise amidst ongoing Russia-Ukraine conflict and the company intends to position itself to benefit from the increase in global demand for fossil energy. In this regard, the company will be focusing on coal beneficiation and improving the quality of its coal.

The company is set to receive a washing plant that will be located near mining areas. This equipment will be commissioned during the first quarter of 2023. The company has plans to build a coke battery by 2025.

#### IAS 29 'Financial Reporting in Hyper -Inflationary Economies'

The Company adopted IAS 29 – “Financial Reporting in Hyper -Inflationary Economies” effective 1 January 2019 as proclaimed by the local accounting regulatory board, Public Accountants and Auditors Board “PAAB”. IAS 29 requires that the financial statements prepared in the currency of a hyper-inflationary economy be stated in terms of a measuring unit current at the balance sheet date. The restatement has been calculated by means of conversion factors derived from the consumer price index (CPI) prepared by ZIMSTAT. The indices used are as follows:

DATE	INDICES	CONVERSION FACTOR
30 June 2022	8 707	1.000
31 December 2021	3 977	2.189
30 June 2021	2 986	2.916

### 3 SIGNIFICANT ACCOUNTING POLICIES

The interim financial statements have been prepared in accordance with the accounting policies adopted in the Company’s most recent annual financial statements for the year ended 31 December 2021.

### 4 ESTIMATES

The preparation of interim financial statements requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expense. Actual results may differ from these estimates.

In preparing the condensed interim financial statements, the significant judgements made by management in applying the Company’s accounting policies and the key sources of estimation uncertainty were the same as those that applied to the audited annual financial statements as at and for the year ended 31 December 2021.

## 20 FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES

The Company's principal financial liabilities comprise loans payable, bank overdrafts and trade payables. The main purpose of these financial liabilities is to raise finance for the Company's operations. The Company has various financial assets such as trade receivables and cash and short term deposits, which arise directly from its operations. Exposure to credit, interest rate and currency risk arises in the normal course of Company's business and these are the main risks arising from the Company's financial instruments.

### 20.1 Credit risk

Management has a credit policy in place and the exposure to credit risk is monitored on an ongoing basis. The Company assumes foreign credit risk only on customers approved by the Board and follows credit review procedures for local credit customers.

Investments are allowed only in liquid securities and only with approved financial institutions. At the reporting date there were no significant concentrations of credit risk. The maximum exposure to credit risk is represented by the carrying amounts of each financial asset in the statement of financial position.

### 20.2 Interest rate risk

The Company's exposure to the risk of changes in market interest rates relates primarily to the Company's long and short term debt obligations and bank overdrafts. The Company's policy is to manage its interest cost using a mix of fixed and variable rate debts.

### 20.3 Currency risk

The Company is exposed to foreign currency risk on transactions that are denominated in a currency other than the Zimbabwean Dollar. The currency giving rise to this risk is primarily the South African Rand. In respect of all monetary assets and liabilities held in currencies other than the Zimbabwe Dollar, the Company ensures that the net exposure is kept to an acceptable level, by buying or selling foreign currencies at spot rates where necessary to address short-term imbalances. The Company's exposure to foreign currency changes for all the other currencies is not significant.
